

neonode

EXISTENCE

NEONODE N1 is a mobile device with many features. The N1 is not only an extremely competent and small telephone. You can also use Neonode N1 as a camera, an MP3 player, a file storage or a game machine. You can use N1 to watch movies or send and receive e-mails or to get connected with your friends on a chat board.

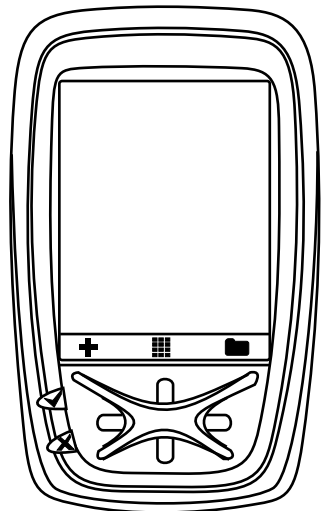

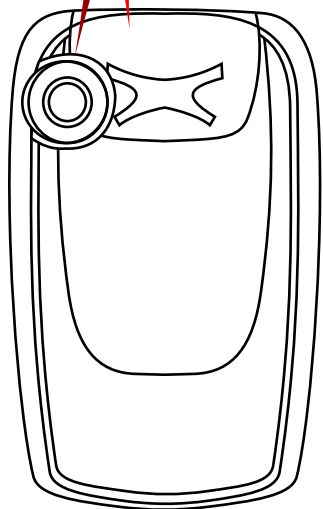

But it is not only about what the Neonode N1 gives you today. N1 is like a small computer and as any computer updateable with new software. To utilize all this, the N1 is equipped with a replaceable mass storage upgradeable to over half a gigabyte.

THE HIFI stereo sound can be used when listening to MP3 music as you move around or at home as a music jukebox. With a 512 Mb storage you can play no less than the equivalent of 20 CDs. USB enables N1 to connect with standard USB gadgets. To speed your text editing, connect a USB keyboard and mouse directly to the Neonode. To download MP3s, upload pictures or charge the N1 just connect it to a PC. Say hi! Take a picture, speak to the microphone and send it. Use MMS to send it to another mobile or Mail to send it to a PC.
